BY TAKING A TEST, YOU WILL QUICKLY RECEIVE INFORMATION ABOUT YOUR HEALTH STATUS.

HOW DOES THE TEST WORK?

FREE TEST – You do not have to pay anything.

ANONYMOUS TEST – No documents or ID card are required.

CONFIDENTIAL TEST – We will not share any information you tell us.

FAST – Results in just a few minutes.

YOU ARE NOT ALONE – Our team will answer your questions and help you understand your test result. If the test result is positive, our psychologists and doctors will support you step by step throughout your treatment journey.

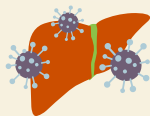

WHAT DO WE TEST FOR?

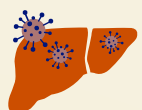

- **HIV (Human Immunodeficiency Virus):** HIV is a virus that attacks the body's immune system. Today, thanks to modern treatments, people living with HIV can live a normal life and protect their loved ones, if the virus is detected early.

- **Syphilis:** Syphilis is a bacterial infection mainly transmitted through unprotected sexual contact. It often shows no clear symptoms at first, but if left untreated it can cause serious health problems over time. It can be completely cured with targeted antibiotic treatment.

- **HBV (Hepatitis B):** Hepatitis B is an infection that affects the liver. It is easily transmitted, but there is a highly effective vaccine to protect against it, as well as specific treatments to manage the virus.

- **HCV (Hepatitis C):** Hepatitis C also affects the liver. Today, it can be completely cured with a simple treatment that usually lasts only a few months.

HOW CAN YOU FIND US?

Call us at
